

Automatic Tower System With Arm Kit

The Tower System combined with our Electric Automatic Arm System will cover containers up to 33 feet. Comes with our waterproof Smart Switch™. One switch for the tower, one switch for the arms. Also available with time tested Superwinch® wireless remote.

Single Spring Arm Kit

These kits are "Simply The Best" because the heavy duty spring housings are fully enclosed, pivot smoothly on UHMW bushings and are not affected by water, salt or grit. The massive 2" spring is powder coated to resist corrosion better than any other spring on the market. The arms are made of Galvanized fence pipe or Common Aluminum pipe for easy replacement.

Semi-Automatic Tower System

Easy Ratchet Spring
Tension Adjustment

The Tower System is also available with the ultra reliable semi-automatic Pulltarp System. With the Tower fully raised, the tarp is pulled out to cover the load and secured to the back of the bin. The Tower is then lowered pulling the tarp down over the front of the bin. The heavy duty 12 gauge steel Wind Guard Housing comes complete with our external spring adjustment and has a lifetime guarantee* on the roller spring.
