

Details Make the Difference

UHMW Sliders

The UHMW Sliders wipe the top rail clean with every cycle. The smooth square base reduces friction and makes cranking easier. Guaranteed to never wear out.

Removable Bows

The tarp does not need to be removed should a bow need replacement. Just loosen the cable, remove the bolt on the slider and the bow slides out of the tarp pocket.

The CLOSER

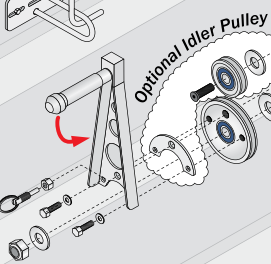

Automatically closes at the tailgate. The CLOSER eliminates the rear flap and the need to fasten down the tarp at the rear of trailer.

Hold Down Hooks

When the tarp is extended the hold down hooks keep the tarp secured from wind.

Cable Tension Adjusting Bolt

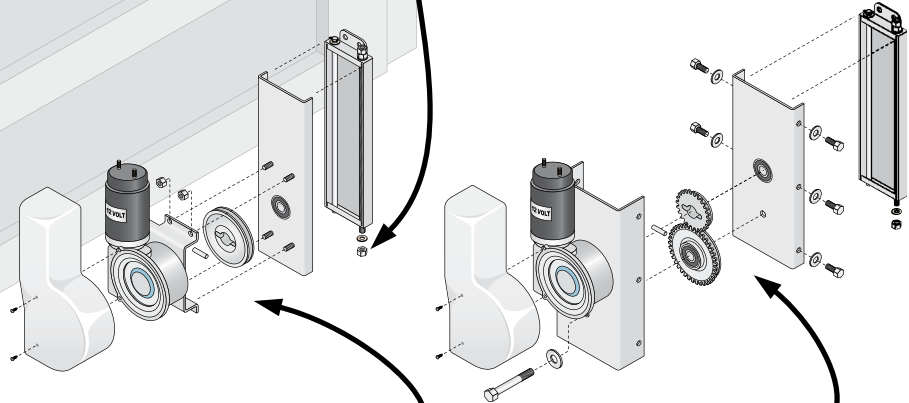

The cable can be tensioned by turning just one bolt on the bottom of the crank base mount.

Optional Idler Pulley

Hand Crank

The rotating handle is easy to hold and folds out of the way. A special locking mechanism secures the handle when fully extended or retracted. Optional Idler Pulley prevents the cable from slipping when used on longer applications.

Electric Motor Drive

The powerful 1.1hp Superwinch® motor drive can be operated by wireless remote control, in-cab switch, or external switch.

Geared Motor Drive

This unique design wraps the cable around two pulleys that are geared together. This prevents the cable from slipping by transferring 100% of the available torque to the cable. Great for longer applications.

Patent # 6,435,595

All Drive Options can be easily upgraded!
