

Manual Arm Kit and Retrofit Kit

Manual Arm Systems

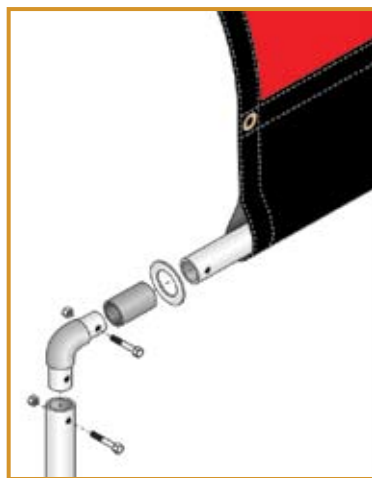

Standard Pulltarps® Systems can be easily ordered or converted to Manual Arm Systems. The Manual Arms mount to the side of the body and lift your tarp up over the load. Economical and easy to use, Manual Arms are great for heaped loads like trash, shrubbery and demolition.

Steel & Aluminum Manual Arm Kits

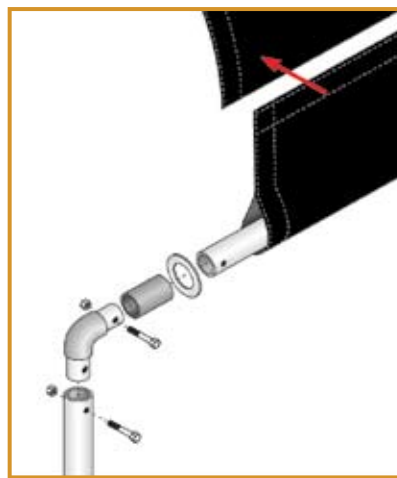

Steel & Aluminum Manual Arm Retrofit Kit

Manual Arm Kit

When a Manual Arm Kit is purchased as a complete kit with housing and tarp, the tarp comes with a pocket sewn in it for the Pullarm to go through.

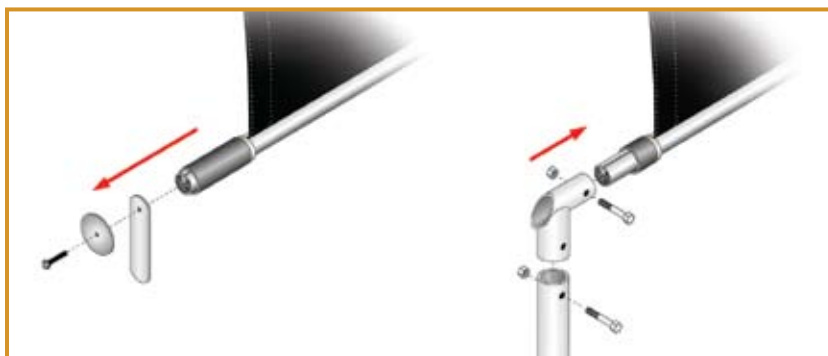

- ▶ Easy Replacement of Pullarm.
- ▶ No Tarp Modification is Necessary.
- ▶ Can deploy tarps up to 22'.

Retrofit Tarp Pocket

Adding a tarp pocket is one solution to upgrading your existing Pulltarps® System to a Manual Arm System. When using standard Manual Arm Kits the Retrofit Tarp Pocket (Part # 499-9801) will need to be sewn to your existing Pulltarps® System.

- ▶ Easy Replacement of Pullarm.
- ▶ Can deploy tarps up to 22'.

Steel & Aluminum Manual Arm Retrofit Kit

Pulltarps® Systems can be retrofitted to Manual Arm Systems. The Large Washer and Tarp Guides are removed from the Pullrod. The PVC Sleeve is cut down and put back on the Pullrod. The Manual Arm Kit with Retrofit Elbows is then added to the existing Pullrod.

- ▶ Available with Steel or Aluminum Arms
- ▶ No Tarp Modification Necessary
- ▶ Easy Installation
- ▶ Can deploy tarps up to 22'.
