Full Line of Tarp Housings

End Caps

The fiberglass reinforced nylon end caps provide friction free operation even in subzero temperatures. Lasts longer than bearings because they're not affected by salt, moisture or grit.
Part # 517-0102

Spring

The Spring is plated to resist corrosion and has a lifetime guarantee.

Grommets

Come standard on all tarps.

Galvanized Roller Tube

Easily remove or install any tarp. Just slide the tarp into or out of the groove on the roller tube.
Part # 501-13XX

Rope Storage Hooks

The hooks are provided for front and rear rope storage. Zinc plated steel or aluminum.
Part # 501-064X

Side Flaps

Vinyl Side Flaps are available for all tarps. See page 47.

40oz. Wear Patch

Protects the tarp where it folds over the tailgate.

Exclusive Mounting System

The threaded mounting bars weld to the truck body and the system is bolted in place. Exclusive mounting bars make installation, maintenance, and removal easy.
Part # 501-15XX

Famous "No BS" Double Guarantee

Internally Webbed Aluminum Pullrod

The Pullrod has an internal web pattern that provides maximum strength. The tarp slides into the groove on the Pullrod. The Pullrod comes in contact with the load before the tarp does.
Part # 517-06XX

Exclusive Dimpled Steel Sleeve

The Dimpled Sleeve does not rotate. This protects the tarp from being cut by the rotating PVC.
Part # 501-1410

PVC Rollers

The PVC Rollers roll along the top rail providing friction free operation. Can be replaced with common PVC Pipe.
Part # 517-0106

Tarp Guides

The Tarp Guides keep the Pullrod centered on the truck body while in operation.
Part # 501-0644

Tarp Return Ramps

Welded to the tailgate, the Tarp Return Ramps help secure the tarp while deployed. The angle at the top allows for easy retracting of the tarp. Zinc plated steel or aluminum.
Part # 501-030X

Braided Loop

The hand braided rope goes through the webbing loop to prevent hanging up when pulling over the tailgate.
Part # 501-10XX

Bungee Cord

The orange and black polypropylene truckers' rope has a bungee cord with a ring attached so it doesn't need to be tied off.
Part # 501-10XX

Fully Upgradeable

Load Climber

See page 13

A great option for getting over peaked loads.

Manual Arms

See pages 15-18

Great for peaked loads of trash or demolition. All of our systems are ground operated.

Automatic Arms

See pages 19-24

Fully Automatic with optional remote control operation. Great for peaked loads trash or demolition.
