

• DETAILS OF TOWER SYSTEMS •

• DETAILS MAKE THE DIFFERENCE •

Teardrop Pullbar

Tarp slides in groove and wraps around our pullbar design.

Tower Hydraulic System

The Tower System includes everything necessary for installation along with our self contained hydraulic power pack.

Urethane Bumpers

Align tarp and protect the body.

Grommets

Come standard on all tarps.

Tower System Options

The Tower System can be operated with our without Arm systems.

Arm Systems Pivots

See page 19 for complete set of Pivots.

Automatic and Semi-Automatic Tower System

The Telescoping Tower system can utilize the Electric Motor or Ratchet Spring Tension Adjustment system.

Telescoping Tower System

The Tower adjusts from 72" lowered, to 120" when fully extended.

Tower System Operation

You can raise the Tower System from the lowered position (A) up to 10' (B). Once the tarp is extended (C), you can lower the Tower to fully secure the load (D).
