

Electric Pulltarps® Systems are designed for longer applications where spring tension alone is not enough to return the tarp. The electric motor feeds the tarp out as you pull and then retracts the tarp back in. The powerful Superwinch® motor has a 3 year prorated warranty.

- Powerful 1.1 hp Superwinch® electric motor
- 1.3 hp Superwinch® electric motor available
- Remote control option available
- Works great in high wind applications

Electric Pulltarps® Systems

9" Open System

Part #110-0215

Universal Super Shield System

Part #111-0215

Part #501-0901

Load Climber

Our Load Climber is a simple solution to keep the pullrod from digging into peaked loads. The Load Climber's rollers lift the tarp up over the load. The Load Climber can easily be added to your pullrod without modifying the tarp.

Manual Arm Upgrade

All Semi-Automatic Pulltarps® Systems are easy to retrofit with Manual Arm Kits. Manual Arms are an economical solution to covering heaped loads on shorter applications. All arm kits are available in steel or aluminum material and bent or straight configurations.

All Semi-Automatic Pulltarps® Systems can be converted to electric drive, manual arms, or automatic arms.

Built To Last

End Caps

The fiberglass reinforced nylon end caps provide friction free operation even in subzero temperatures. Lasts longer than bearings because they're not affected by salt, moisture or grit.

Internally Webbed Aluminum Pullrod

The Pullrod has an internal web pattern that provides maximum strength. The tarp slides into the groove on the Pullrod. The Pullrod comes in contact with the load before the tarp does.

Exclusive Dimpled Steel Sleeve

The Dimpled Sleeve does not rotate. This protects the tarp from being cut by the rotating PVC.

PVC Rollers

The PVC Rollers roll along the top rail providing friction free operation. Can be replaced with common PVC Pipe.

Tarp Guides

The Tarp Guides keep the Pullrod centered on the truck body while in operation.

Spring

The Spring is plated to resist corrosion and has a lifetime guarantee.

Grommets Come standard on all tarps.

Galvanized Roller Tube

Easily remove or install any tarp. Tarp slides in and out of the groove on the roller tube.

Rope Storage Hooks

The hooks are provided for front and rear rope storage. Zinc plated steel or aluminum.

40 oz. Wear Patch Protects the tarp where it folds over the tailgate.

Braided Loop

The hand braided rope goes through the webbing loop to prevent hanging up when pulling over the tailgate.

Bungee Cord

The orange and black polypropylene truckers' rope has a bungee cord with a ring attached so it doesn't need to be tied off.

Tarp Return Ramps

Welded to the tailgate, the Tarp Return Ramps help secure the tarp while deployed. The angle at the top allows for easy retracting of the tarp. Zinc plated steel or aluminum.

Pulltarps Tarping Systems

Pulltarps® Systems

Semi-Automatic Pulltarps® Systems are the original spring-return tarping system. These systems operate by manually pulling the tarp out over the load with a pullrope. The tarp is then rolled back into the housing using the spring tension within the roller mechanism. These tarp systems are great for most applications and are the economical solution to your tarping needs. Stock widths include 80", 84", 87", 89", 93", 96", and 100" inches. All systems include steel or aluminum mounting brackets/ mounting bars. All Semi-Automatic Pulltarps® Systems have a lifetime guarantee* on all moving parts.

External Ratchet Assembly

Another exclusive feature of Super Shields, Ultimate Aluminum systems, and X-Pando systems is its External Spring Tensioning capabilities. This ratchet mechanism makes adjusting the spring fast and easy without removing the tarp.

9" Open Pulltarps System

A basic system great for applications where loader and wind damage is not a concern. Available options include Spacer Rod, and Aluminum Wind Guard

- Black Powder Coated End Plates
- Economical
- Optional Spacer Rod available (shown)
- Optional Wind Guard available (501-1001)
- Holds up to 30' of tarp
- Can ship via UPS

9" Open System Part #105-0215

7" Aluminum Pulltarps System

Designed for weight saving applications. Comes complete with windguard.

- Aluminum End Plates
- Holds up to 22' of tarp
- Exclusive mounting bars make installation, maintenance, and removal easy
- Can ship via UPS

7" Aluminum Part #103-0215

Steel Protector Pulltarps System

Offers good protection against loader damage, falling debris, and wind.

- Ships Fully Assembled via UPS
- Galvanized End Plates
- Galvanized Steel Housing
- Housing has a vertical back that mounts flush with cab shield
- Holds up to 18' of tarp

Steel Protector Part #106-0215

Protector Plus Pulltarps System

Designed for longer applications that require some protection from falling debris. Available in steel.

- Galvanized End Plates
- Galvanized Steel Housing
- Holds up to 28' of tarp
- Ships fully assembled via UPS

Steel Protector Plus Part #114-0215

X-Pando Pulltarps System

Super tough X-Pando housing that adjusts to fit any truck between 78" to 102".

- Galvanized protector for a clean appearance and will not rust.
- Excellent protection from loader bucket damage and falling debris
- No rust galvanized End Plates
- Holds straight tarps up to 30'

X-Pando Part #116-3017

Super Shield Pulltarps System

Powder coated 12 gauge steel housing for highest protection against loader damage and falling debris.

- Fully Welded
- Powder coated steel housing resists corrosion
- The housing is radiused for added strength
- Exclusive mounting bars make installation, maintenance, and removal easy
- Holds up to 18' of tarp

Super Shield Part #107-0215

Universal Super Shield Pulltarps System

This is our best selling system with the highest capacity. It is fully welded and powder coated for the best protection from falling debris.

- Powder coated steel housing resists corrosion
- The housing is radiused for added strength
- Holds up to 30' of tarp
- Exclusive mounting bars make installation, and removal easy

Universal Super Shield Part #108-0215

Ultimate Aluminum Pulltarps System

Designed for truck enthusiasts who want their tarp system to look as good as their rig.

- Great looking polished aluminum housing
- Machined Aluminum End Plates with Black Accent Relief
- Holds up to 30' of tarp
- Exclusive mounting bars make installation, maintenance, and removal easy

Ultimate Aluminum Part #109-0215
