SIMPLY THE BEST • MADE IN THE USA

# PULLTARPS SYSTEMS

## Key Features

- ▶ End Caps
- ▶ Bungee Cord
- ▶ Braided Pull Rope
- ▶ Tarp Return Ramps
- ▶ Rope Storage Hooks
- ▶ Pullrod Hardware Kit
- ▶ Galvanized Roller Tube
- ▶ Exclusive Mounting System
- ▶ Fully Upgradeable

## BUILT TO LAST

WE OFFER THE BEST TRUCK TARPING SOLUTIONS

# • PULLTARPS HOUSINGS •

Tarps Sold Separately - Stock Housing Widths 80", 84", 87", 89", 93", 96", & 100"

## 9" Open Pulltarps® System

Most basic system offered. Good for applications where wind and falling debris are not a problem.

**Part # 105-0215**

## X-Pando Pulltarps® System

Super tough X-Pando housing uses telescoping technology to fit any truck from 78" to 102".

**Part # 116-3017**

## 7" Aluminum Pulltarps® System

Designed for weight saving applications. Comes complete with wind guard.

**Part # 103-0215**

## 8.5" Super Shield Pulltarps® System

Radiused for strength, the 12 gauge steel constructed housing offers the best protection from falling debris and powder coated to resist corrosion.

**Part # 107-0215**

## Steel Protector Pulltarps® System

Designed to be mounted against the cab shield so material will roll off into box. Galvanized end plates and housing protect against corrosion.

**Part # 106-0215**

## Universal Super Shield Pulltarps® System

Super strong system with higher tarp capacity. The fully welded 12 gauge steel construction offers the best protection from falling debris.

**Part # 108-0215**

## Protector Plus Pulltarps® System

Designed for longer applications that require some protection from falling debris. Available in Steel.

**Part # 114-0215**

## Ultimate Aluminum Pulltarps® System

Designed for truck enthusiasts who want their tarp system to look as good as their rig.

**Part # 109-0215**

Stock Widths:  
80", 84", 87", 89", 93", 96"  
Custom Widths Are Available

# • DETAILS MAKE THE DIFFERENCE •

## Famous “No BS” Double Guarantee

### Super Strong Radiused Housing

The Super Shield's radiused steel housing is so strong it can actually hold a full size diesel pickup truck without any bending or binding of the housing. The system still works with the weight of the truck on the housing. This test is guaranteed to crush any competitors tarp system.

### Ratchet Assembly

Another exclusive feature of Super Shields and Ultimate Aluminum systems are their External Spring Tensioning capabilities. This ratchet mechanism makes adjusting the spring fast and easy by using a 3/4" wrench.

**Part # 501-0630**

### 9" Open Electric Pulltarp® System

The Electric 9" Open System is designed for longer applications where spring return is marginal.

**Part # 110-0215**

(Spacer Rod comes with Electric Open System.)

Stock Widths:  
80", 84", 87", 89", 93", 96", 100"  
Custom Widths Are Available

### Electric Pulltarps Systems Universal Super Shield Electric Pulltarps® System

The Electric Universal Super Shield System is designed for longer applications where spring return is marginal.

**Part # 111-0215**

Stock Widths:  
80", 84", 87", 89", 93", 96", 100"  
Custom Widths Are Available

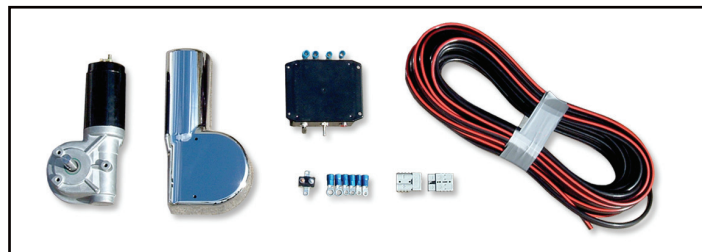

### Ultimate Aluminum Electric Pulltarp® System

The Electric Ultimate Aluminum System is designed for longer applications where spring return is marginal.

**Part # 112-0215**

Stock Widths:  
80", 84", 87", 89", 93", 96"  
Custom Widths Are Available

### Electric Pulltarps

Electric Pulltarps® Systems are designed for longer applications where spring tension alone is not enough to return the tarp. The electric motor feeds the tarp out as you pull and then retracts the tarp back in.

### How to Operate

Flip the switch at the rear of the trailer and pull the tarp all the way out over the tailgate. Flip the switch again to reverse the tarp and secure the pullrod under the tarp return ramps.

To retract the tarp, reverse the switch to release the pullrod from the tarp return ramps. Turn the switch to rewind the tarp back into the housing. Hold the pullrope to guide the tarp as it retracts.

**Pulltarps® and Electric Pulltarps® Systems**

# • PARTS AND ACCESSORIES •

## Manual Arm Upgrade

Semi-Automatic Pulltarps® Systems are easily upgraded to steel or aluminum Manual Arm Systems. Manual Arm Systems are great for heaped loads because the tarp is lifted up and over the load. The arms are available in bent or straight configurations.

## Automatic Arm Upgrade

All Semi-Automatic Pulltarps® Systems are easy to retrofit with steel or aluminum Automatic Arm Sets. Automatic Arm Systems can be operated from inside the cab or wireless remote. These systems are fast and take no effort to cover the load.

**Part # 230-0215**

(Price depends on options chosen.)

## Load Climber

Our patented Load Climber is a simple solution to keep the pullrod from digging into peaked loads. The Load Climber's rollers lift the tarp up over the load and can easily be added to your pullrod without modifying the tarp. For Pulltarps® and Electric Pulltarps® Systems only.

**Part # 501-0901**

(Patent # 5,697,663 & 5,882,062)

## Asphalt Load Climber

The Asphalt Load Climber is rated for a maximum heat deflection of 495 degrees fahrenheit. The Asphalt Load Climber's rollers lift the tarp up over the load and can easily be added to your pullrod without modifying the tarp. For Pulltarps® and Electric Pulltarps® Systems only.

**Part # 501-0913**

(Patent # 5,697,663 & 5,882,062)

## Tarp Tamer

Tarp Tamer's fixed roller holds the front of the tarp down to prevent material from blowing out. The Tarp Tamer can be used with Pulltarps®, Manual Arm, and Automatic Arm systems.

**Part # 501-0701**

## Open System Wind Guard

Protect the tarp from wind damage with the optional Wind Guard. Directs the wind up and over the tarp rather than under it. Simple installation and economical.

**Part # 501-1001**
