Telescoping Tower System

You can't top our Telescoping Tower System designed specifically for the Waste Industry. The Tower adjusts from 72" lowered, to 120" when fully extended.

Features and Benefits

- ▶ Full 4 feet of Tower lift.
- ▶ Power up and down.
- ▶ 2" x 4 3/16" wall rectangular steel tube.
- ▶ Bolts to frame with U bolts (included).
- ▶ Wiring terminal ends pre-assembled.
- ▶ Fixed Ram eliminates hose movement and wear.
- ▶ Remote switch mounts anywhere.
- ▶ Time tested electric Smart Switches™.
- ▶ Installs in a few hours.

Wireless Remote

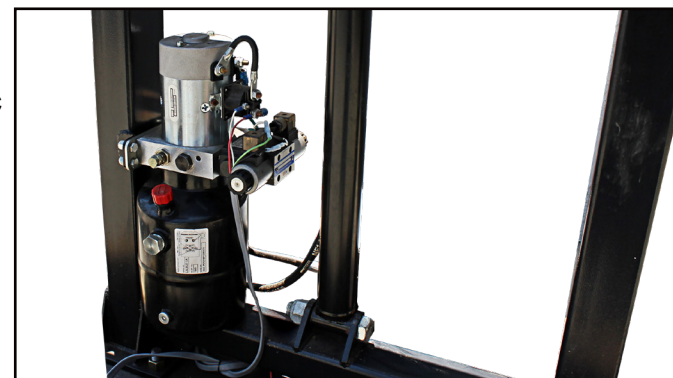

Easy to install with no switch to wire. Great option for Automatic Tower Systems with arm kits. The unique transmitter codes do not interfere with other remote devices. Can be operated up to 150 feet away and 360° around the truck.

Part # 514-0141

Tower Hydraulic System

The Tower System includes everything necessary for installation along with our self contained hydraulic power pack.

Part # 501-2312

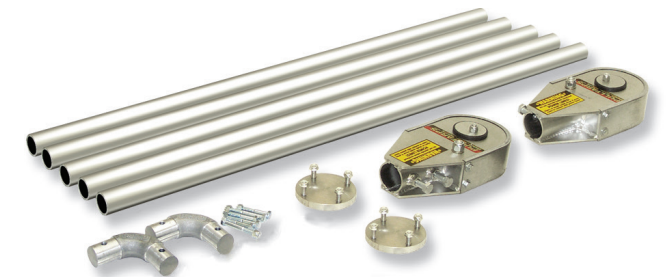

Pulltarps® Tower Systems

• DETAILS MAKE THE DIFFERENCE •

Single Spring Arm Kit

These kits are "Simply The Best" because the heavy duty spring housings are fully enclosed, pivot smoothly on UHMW bushings and are not affected by water, salt or grit. The massive 2" spring is powder coated to resist corrosion better than any other spring on the market. The arms are made of Galvanized fence pipe or Common Aluminum pipe for easy replacement.

Complete Automatic Tower System with Arm Kit & Switch

The Tower System combined with our Electric Automatic Arm System will cover containers up to 33 feet. Comes with our waterproof Smart Switch™. One switch for the tower, one switch for the arms.

(Steel Arm < 33') **Part # 513-0701**

(Alum Arm < 33') **Part # 513-0702**

(Alum Arm < 40') **Part # 513-0703**

Semi-Automatic Tower System

The Tower System is also available with the ultra reliable semi-automatic Pulltarp System. With the Tower fully raised, the tarp is pulled out to cover the load and secured to the back of the bin. The Tower is then lowered pulling the tarp down over the front of the bin. The heavy duty 12 gauge steel Wind Guard Housing comes complete with our external spring adjustment and has a lifetime guarantee* on the roller spring.

Easy Ratchet Spring Tension Adjustment.

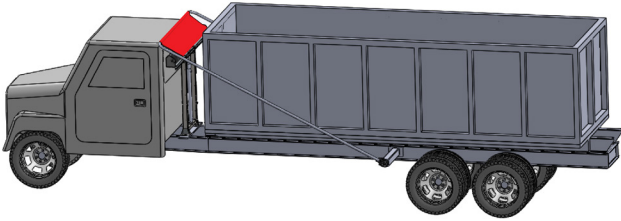

Pulltarps® Tower Systems

• HOW IT WORKS •

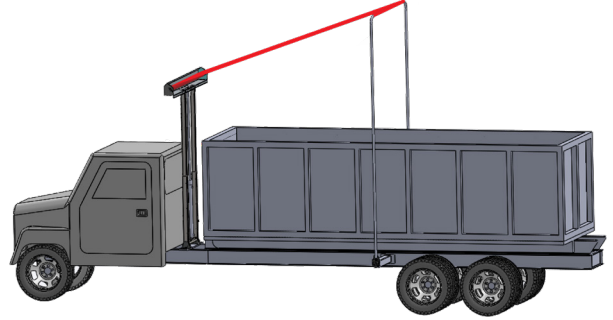

Tower System Operation

You can raise the Tower System from the lowered position (A) up to 10' (B). Once the tarp is extended (C), you can lower the Tower to fully secure the load (D).
